Data collection and security

Review the list of required user data types that you need to disclose. [View required data types](#)

Does your app collect or share any of the required user data types?

Yes

Is all of the user data collected by your app encrypted in transit? [Learn about how you should answer](#)

Yes

No

Answer new questions about account deletion by December 7, 2023

To give users more transparency and control over their data, we've added some new questions about account deletion. You must submit answers to the additional questions by December 7, 2023. Before this date, if your app update is rejected due to your answers to these questions, you can remove your answers and submit another update.

[Learn more](#) Dismiss

Which of the following methods of account creation does your app support? Select all that apply (Optional)

This includes accounts created entirely within your app, or by redirecting users to a webpage where they can create an account.

Usernames include user IDs, email addresses, and phone numbers. Authentication includes two-factor, one-time password, biometric, or single sign-on authentication.

Username and password

My app does not allow users to create an account

[Remove answers](#)

Add a link that users can use to request that their account and associated data is deleted

Delete account URL

This link will be shown on your Google Play store listing, and should:

- refer to your app or developer name that is shown on your store listing
- prominently feature the steps that users should take to request that their account is deleted
- specify the types of data that are deleted or kept, and any additional retention period

Do you provide a way for users to request that some or all of their data is deleted, without requiring them to delete their account? (Optional)

Providing this functionality gives users more control over their data. [Learn more](#)

Yes

No

No, but user data is automatically deleted within 90 days

[Remove answers](#)

No

Data types

Select all of the user data types collected or shared by your app. [Learn more](#)

You must select:

- Any user data types that are collected and/or shared
- Any user data sent off the user's device by libraries or SDKs used in your app, regardless of whether this information is transmitted to you (the developer) or a third party
- Any user data transferred from your server to a third party, or transferred to another third party app on the same device
- Any user data collected or transferred through a webview which can be opened from your app - unless users are navigating the open web

Some types of data collection and transfers are exempt. [View exemptions](#)

When you've selected all of the user data types collected or shared by your app, select Next.
